# Public

- Public and patient involvement (...from the beginning)
- Awareness and Education
- Work to reach the 'hard to reach'
  - Targeted pilot programmes
- Changing the language around the disease

# Healthcare systems

- Appropriate literature and information
- E-health records
- Increased infrastructure and staffing
- Appropriate and timely management of ‘incidental findings’
- Access to psychological help

# We need to work together

- Active shared decision making
- Integrated healthcare systems and services

# Get implementing!
